

## JOIST PROJECT HOUSE #8 UPDATE

Our Masonry students have completed the foundation and the Carpentry students are hard at work on the construction of the 8<sup>th</sup> house built in Warsaw through our JOIST Project (Joint Opportunity in Student Training). This house, located at 182 Freedom Way, should be completed by Spring 2011. Thanks to the proceeds from the sale of the 7 prior homes since 1995, the Northern Neck Technical Center Foundation has been able to award over \$96,000 in scholarships to 93 deserving Tech Center completers. Check back throughout the year to watch the progress of our most recent construction project, as the Electricity students wire the house and a LAN system is installed by students in the Computer Maintenance Technology program.

Our 7th house was completed in Spring 2009 and sold for \$267,500 soon afterwards. The JOIST Project allows local students to have actual experience building a house as well as gaining valuable learning experience in their chosen fields.
